Not knowing how to perform any kind of data analysis.

Familiarizing with Excel and how Purolator as an industry works.

Jan

Feb

Assisting in other Excel projects and customer analysis.

Independently able to create customer analysis.

Mar

Apr

Creating Automated Dashboards.

My Feedback

Supportive environment – available resources, can ask anyone for help.

Quick onboarding (laptops, SAP PW7) – took only 1 week

Visit to NHO – learned a lot on how Purolator works

BI slow refresh rate – takes 2-3 minutes and occasionally not working

OTP EDD Dashboard - sometimes updates with incorrect numbers

Mostly remote - would like to see the team more in person!

What I'll Bring with Me

"The thing you remember in 10 years is not the reports, but how you made someone feel and how they made you feel."

— **Naziha Haroon**

"Don't make everything too complicated, try to think backwards from the end to the start."

— **Abhishek Rawat**

"Try to explore different areas. Try to find something that you are interested in and pursue that."

— **Roger Huang**

"Keep an open mind. You can't use the same method to answer the same questions. Get to the very specifics of the question."

— **Gabor Torma**

"Always share your point of view but be respectful. There will always be an opportunity to sell yourself."

— **Claudia Manrique**

What I'll Bring with Me

“Do different things outside of school. More fun things that don’t necessarily boost your resume.”

— **Marc Dotto**

“Go for the extra mile. Work hard and support everyone for every single day.”

— **Pablo Roldan**

“Don’t wait for motivation to come from outside or from other people. It’s natural to feel fear and unqualified. Just do it.”

— **Carolina Rojas**

“It is important to establish your definition of success. It should line up with whatever path you have chosen. The sooner you define it, the better it is for you.”

— **Yasir MuhammadAli**

“Expect the unexpected and be okay with it. You will learn as you go, just embrace all these experiences. Don’t be afraid of these opportunities.”

— **Kristy Sood**

What I'll Bring with Me

"Working with the right people is more important than the job itself. Step outside of your comfort zone."

— **Shivali Sharma**

"Worry less about getting things perfectly, eventually you will get to where you are trying to get to. Be persistent."

— **Pablo Reyes**

"Keep pushing yourself to take on more and show initiative in your future roles. Be eager to learn. Challenge yourself. Fail fast so that you can learn and do better, quicker."

— **Priya More**

"What you take now does not define who you are, not the path you are going to take. Don't take yourself too seriously. Focus on the problem, not the people (in conflict resolution)."

— **Jamie Wright**

Thank you!

For the past 4 months filled with memories that
I'll treasure for the rest of my life.
